

10 Reasons Why Businesses Are Moving to Hybrid Cloud

Agility and Flexibility, With Hitachi Hybrid Cloud Infrastructure

Hybrid cloud is quickly becoming the gold standard for organizations looking to increase agility and overcome operational complexity.

There are a multitude of reasons why, from faster application development to workloads and services where you — and your customers — need them, in an instant. If you're still looking for answers, here are ten reasons why more and more customers are moving to Hitachi Hybrid Cloud Infrastructure, powered by VMware Cloud Foundation.

Simplify

1

One platform for your hybrid and multi-cloud strategy. Hitachi Unified Compute Platform RS supports traditional VMs and modern containerized workloads.

VMware Tanzu = modernize apps anywhere and get complete agility and scale.

2

Simplify Day 0-2 management with Unified Compute Platform Advisor — smoothing deployment, configuration, life-cycle management, and ongoing operations with advanced automation.

Accelerate

3

Accelerate infrastructure deployment and configuration, with intelligent automation powered by Unified Compute Platform Advisor and VMware Cloud Foundation.

- Minimize deployment risk
- Reduce provisioning time and complexity
- Automate hundreds of mandatory tasks.

4

Turbo-charge mission-critical apps with a high-performance hyperconverged infrastructure powered by Intel 3rd gen processors and Optane 2nd gen SSD.

5

Accelerate modern workloads, from AI and data analytics to HPC, with an AI-driven infrastructure.

Powered by Nvidia A100 processors

Optimize

6

Zero-worry software and firmware upgrades for the entire infrastructure stack with vSphere lifecycle management.

One-push upgrades for:

- Hyperconverged nodes
- SSDs and drives
- I/O cards
- IP & FC switches.

7

Deploy workloads on the storage platform of your choice, enabling the best app SLOs, avoiding silos and maximizing on existing storage investments.

Cut Costs

8

Reduce acquisition and operational costs, with lower compute core and operational overheads while maximizing on your existing SAN investments.

Peace of Mind

9

Protect against cyber threats with granular data protection, advanced security fabric and micro-segmentation ensuring business continuity.

10

Benefit from deep industry expertise when you partner with Hitachi and get a cloud solution built to set you apart from your competition.

The Best of Hybrid Cloud

You can have the best of public and private clouds with a hybrid cloud infrastructure designed for you. Putting your workloads right where you need them, when you need them. Enabling faster service delivery. Improved efficiencies. Better customer satisfaction.

And when you partner with Hitachi, you can also expect exceptional service delivery and assurance for the entire stack — including hardware and software — from our experts.
