# Hitachi Ops Center Learning Path

Storage Administrator

Optimize your storage with Hitachi Ops Center

The Storage Administrator learning path will help you acquire the skills you need to manage, automate, and troubleshoot storage from Hitachi Vantara.

Hitachi Ops Center Fundamentals with Hands-on Labs
1174CP | Online

Learn the essential concepts a storage admin needs to be confident to provision storage systems with Ops Center Administrator, protect data with Ops Center Protector and analyze performance with Ops Center Analyzer and Detail view. The course provides opportunities to practice with hands-on lab activities designed to build the skills necessary to use Ops Center Suite.

Managing Ops Center Analyzer
TXI3684 | 3-Day ILT/vILT

Learn the metrics and concepts required to perform analysis, monitorization and health-checks using Hitachi Ops Center Analyzer products including Analyzer detail view and Analyzer Probe. Additionally, hands-on lab activities enable you to gain practical experience as you learn how to use different tools working with real performance scenarios.

*Completion of this course will earn you a **Hitachi Ops Center Analyzer Management** Digital Badge.*

*This course prepares you for the **Hitachi Vantara Qualified Professional - Ops Center Analyzer Management (HQT-6771)** exam. ***

Storage Performance Analysis with Hitachi Ops Center Analyzer
1050CI | 3-Day ILT/vILT

Get the skills and knowledge to carry out performance analysis on Hitachi Storage arrays using Hitachi Ops Center Analyzer, and interpret the results to determine actions to maintain performance targets.

Transitioning From Hitachi Command Suite to Hitachi Ops Center Administrator
1089CI | 2-Day ILT/vILT

This course assists customers currently on Hitachi Command Suite in transitioning basic administration and provisioning tasks to Hitachi Ops

* This closed-book, proctored qualification test is available using the Kryterion Webassessor system, either as online-proctored or on-site at Kryterion testing centers.

Center Administrator. These tasks include storage setup and configuration (onboarding and discovering storage), creating parity groups, pools, volumes and LUNs (provisioning volumes to the host), and managing and creating Volume Migration. It also explains how to manage and monitor storage from the Hitachi Ops Center Administrator Dashboard. Hands-on labs are also available for practice.

*Completion of this course will earn you a **Hitachi Ops Center Administration Management** digital badge.*

Managing Hitachi Ops Center Automator
TSI2690 | 2-Day ILT/vILT

Gain insight into the Hitachi Ops Center Automator tool and its functions. The course covers the key features and architecture of Automator and how to navigate the dashboard and perform important service management functions, such as creating and running a service.

*Completion of this course will earn you a **Hitachi Ops Center Automator Management** Digital Badge.*

*This course prepares you for the **Hitachi Vantara Qualified Professional - Ops Center Automation (HQT-6761) exam.***

Managing Hitachi Ops Center Administrator
TSI2929 | 5-Day ILT/vILT
TSB2929 | 2-Days ILT/vILT + Online

Learn about Hitachi Ops Center Administrator architecture and key features while exploring how to manage storage from the Ops Center Administrator dashboard. This course explains the process of onboarding a storage system, fabric switch and server with Administrator. It shows how to provision and create parity groups, pools, volumes, and how to allocate LUNs.

*Completion of this course will earn you a **Hitachi Ops Center Administration Management** Digital Badge.*

*This course prepares you for the **Hitachi Vantara Qualified Professional - Ops Center Administration (HQT-6741) exam.***

*If you complete the **Managing Hitachi Ops Center Administrator course** and pass the **HQT-6741 exam**, you will learn the **Data Center Administration** Digital Badge.*

Storage Concepts
CCI0110 | 2-Day ILT/vILT

Get a comprehensive introduction to storage technology concepts, terminology, and the technologies of today's storage industry. See how storage solutions manage and optimize an IT infrastructure to meet business requirements. The course also reviews the major components of a storage system, common storage architectures, and the various means of connecting storage elements while also comparing network attached storage (NAS) and storage area network (SAN) implementations, data protection and storage performance issues.

*This course prepares you for the **Hitachi Vantara Qualified Associate - Storage Concepts (HQT-0050) exam.***

Working with Hitachi Ops Center
TXI3932 | 5-Day ILT/vILT

From analytics and monitoring to automation, administration and data protection, this course will show you how Ops Center can optimize the storage in your data center. Hands-on labs provide practice on administering and provisioning the infrastructure management suite.

*This course prepares you for the **Hitachi Vantara Qualified Associate - Ops Center Operations (HQT-6751) exam.***

Managing VSP Midrange Storage with Embedded GUI
1045CI | 1-Day ILT/vILT

Learn basic administration and provisioning tasks associated with Hitachi Virtual Storage Platform (VSP) midrange products using the embedded GUI management software. Learn to create and edit pools, volumes, servers and manage ports. Additionally, the course explains when to use the embedded management software and other options such as Hitachi Ops Center and command line interface. Various hands-on lab activities are offered to give you practice on common storage operations in a safe virtual environment.

Introduction to Hitachi Storage Architecture
TCI2626 | 2-Day ILT/vILT

Learn the architecture of Hitachi Virtual Storage Platform (VSP) models such as VSP 5000 series, VSP G1000, VSP F1500, VSP G1500, VSP E series, and midrange models. The course also covers unified storage with embedded NAS modules supported by the midrange models ranging form VSP G400 to VSP G800. Lab activities include identifying components, mapping storage volumes and connecting to the storage management tools such as Hitachi Ops Center Administrator.
