Hitachi Advisory Services for SAP® Analytics

Drowning in data but starving for information? Unlock the value of your enterprise and machine data.

Data has overtaken oil as the world's most valuable resource (source: *The Economist,* May, 2017). Your organization might already analyze data from SAP® systems and the Internet of Things (IoT) to understand what's happening and why. Take a leap forward by predicting events—and automating the response to optimize operations and fuel growth. Modern cloud analytics requires the right data architecture, people and processes.

With Hitachi Advisory Services for SAP Analytics you receive a complete solution—SAP Analytics Cloud integrated with leading open-source and third-party technologies. Your organization also receives a robust framework for data governance, including standards, quality processes, administrative processes, monitoring and an insights dashboard for decision makers.

Hitachi Advisory Service for SAP Analytics is part of Hitachi's complete SAP portfolio of solutions and services. We help add value to your SAP technologies and investments by optimizing the digital core, unleashing the power of the cloud and extending the digital core with machine learning, analytics and robotic automation—for smart, connected operations.

Key Benefits
- Achieve more value from SAP and IoT data
- Increase information integrity, strengthening stakeholders' confidence in data
- Uncover data insights for a competitive advantage:
    - Business performance management
    - Price intelligence and optimization
    - Customer and product lifecycle excellence
    - Continuous monitoring of assets and preventive maintenance
    - Enhanced fraud detection and loss prevention
