

Hitachi Cloud Advisory for SAP® Solutions

Identify the optimum cloud for your environment

Shifting SAP® solutions to the cloud helps address business challenges such as aging infrastructure, reliability, availability, performance, business continuity and total cost of ownership. With the Cloud Advisory Assessment, we help identify the optimum cloud platform for your SAP workloads by comparing performance and costs on Amazon Web Services (AWS), Google Cloud Platform™ or Microsoft® Azure.

Hitachi Cloud Advisory for SAP Solutions is part of Hitachi's complete SAP portfolio of solutions and services. We help add value to your SAP technologies and investments by optimizing the digital core, unleashing the power of the cloud and extending the digital core with machine learning, analytics and robotic automation—for smart, connected operations.

Key Benefits

Moving SAP workloads to the right cloud helps you:

- Shift from a CapEx to OpEx financial model
- Increase operational efficiency and reduce overhead for specific SAP workloads
- Increase flexibility and agility by scaling up and down based on fluctuating demand
- Scale for business growth, mergers and acquisitions

Solution Detail

- **Assess:** Cloud advisory and assessment services for planning cloud adoption and the transformation journey. This phase includes formulating an appropriate cloud adoption strategy, roadmap and a business case to align with defined goals and objectives across people, process and technology.
- **Transform:** Cloud transformation services for rapid cloud migration and adoption, risk-mitigated business continuity, enhanced agility and requisite security safeguards.
- **Manage:** Cloud operations and management services to support, maintain and optimize applications in the cloud.
