

Hitachi Digital Manufacturing Assessment

Fast track your journey to the Intelligent Enterprise

Picture having real-time visibility into operations, predicting variances before they occur and adapting to changing conditions on the fly. It's the Intelligent Enterprise. The Hitachi Digital Manufacturing Assessment includes a discovery workshop that accelerates your company's journey and reduces risk by providing a business case and project plan before you invest in infrastructure and analytics. During the engagement, we assess costs and rewards of extending your SAP S/4HANA® digital core using SAP Analytics and Hitachi digital accelerators for SAP Leonardo®, such as Predictive Quality, Dynamic Scheduling and Predictive Uptime.

The Hitachi Digital Manufacturing Assessment is part of Hitachi's complete SAP portfolio of solutions and services. We can also move your core ERP to SAP S/4HANA or S/4HANA Cloud and implement the recommendations from the assessment to improve key performance indicators (KPIs) such as uptime, quality, throughput and labor utilization.

Key Benefits

- Fast-track your journey to the Intelligent Enterprise with a thorough project plan and roadmap
- Assess the costs and business value of different use cases
- Accelerate outcomes from artificial intelligence, machine learning and process automation, so you can:
 - Trim waste, rework and labor overtime
 - Lower manufacturing production costs
 - Reduce recalls and warranty claims
 - Optimize inventory
 - Eliminate unplanned downtime
 - Improve safety and reduce environmental incidents
 - Manage compliance and sustainable use of water and energy
 - Enhance the customer experience
 - Boost productivity and top-line performance
 - Enhance delivery metrics such as On-Time, In Full (OTIF) delivery

Solution Detail

- Use cases – definition and priorities for your business
- Business case and ROI study, including quick wins and KPI targets
- Project plan and roadmap
- Gap analysis of your existing IT landscape, SAP environment and business processes
- Prototype and roll-out plan and recommendations
