Hitachi Virtual Storage Platform One Block High End Storage Starter Pack

Unified, AI-ready storage delivers resilient performance for every workload

VSP One Block High End is a flexible, high-performance block storage platform for any environment, and Storage Starter Pack ensures a smooth implementation process.

VSP One Block High End is a sophisticated, highly configurable block storage solution built for organizations that demand operational resilience and ease of management. It integrates seamlessly into diverse environments, supporting a wide range of performance, capacity, and architectural requirements that are critical to IT leaders.

With the Storage Starter Pack, Hitachi Vantara provides a guided, expert-led implementation experience designed to help IT and storage teams accelerate time-to-value. This includes proper installation, configuration, analytics migration, and operational readiness of Hitachi Virtual Storage Platform 360 (VSP 360) management software and core storage services - ensuring teams can operate with confidence from day one.

Knowledge Gaps

IT leaders, operations managers, and storage administrators often struggle with inconsistent deployments across storage environments, which increase complexity and risk, making it harder to maintain performance and protection.

Expert Implementation

VSP One Storage Starter Pack delivers a structured, best-practice onboarding experience that accelerates deployment and enhances operational intelligence. It standardizes installation, streamlines analytics migration, and configures the system for mission-critical, high-performance, and resilient operations. Hands-on knowledge transfer equips IT and storage teams with the operational skills they need while ensuring the environment is deployed correctly and continuously optimized for long-term adaptability and growth.

Key Benefits

- Achieve faster deployment and time to value of VSP One Block High End.
- Deploy optimized configurations for mission-critical, high-performance, and resilient operations.
- Enhance visibility and insights with VSP 360 Clear Sight analytics.
- Improve reliability and empower IT teams through predictable performance and hands-on knowledge transfer.

Starter Pack Deliverables

Experience a streamlined deployment of VSP One Block High End and the VSP 360 common control plane as well as a smooth migration from Hitachi Ops Center Analyzer to VSP 360 Clear Sight. IT and operations teams gain immediate visibility into actionable insights and performance data, enabling more efficient management and consistent high-quality operations.

Optimized Storage Provisioning and Protection Foundation

Hitachi experts establish a best-practice storage foundation by creating and allocating up to two volumes for up to three hosts. This includes configuring Hitachi Thin Image Advanced with a snapshot schedule for one logical unit number (LUN) across three hosts. This ensures the environment is properly provisioned, protected, and ready to support production workloads with minimal friction for IT operations.

Knowledge Transfer and Operations Enablement

Teams receive practical, hands-on training in LUN provisioning, host mapping, storage pool management, alert monitoring, and performance planning with VSP 360 Clear Sight. This is specifically designed to help IT admins, storage admins, and operations teams strengthen their skills and reduce reliance on external resources. It also enables procurement stakeholders to confirm that operational-readiness and supportability requirements are met.

Summary

Hitachi Virtual Storage Platform One Block High End Storage Starter Pack delivers an efficient, accelerated and scalable deployment experience tailored for modern IT organizations. With best-practice implementation, high-performance and deep auditability, this Hitachi solution ensures that environments are deployed correctly and optimized to adapt to continuous change. IT and operations teams benefit from faster provisioning, smoother operations, improved reliability and lower costs — making VSP One Block High End a future-ready investment.

Engineered for Efficiency, Performance, and Scalable Growth

- Deliver faster provisioning, smoother operations and consistently reliable outcomes.
- Leverage Hitachi best-practice set-up, engineering and proven methodologies.
- Ensure deep auditability and robust monitoring for optimized performance.
- Benefit from a flexible blended delivery model combining local and centralized expertise.

About Hitachi Vantara

Hitachi Vantara is transforming the way data fuels innovation. A wholly owned subsidiary of Hitachi, Ltd., we're the data foundation the world's leading innovators rely on. Through data storage, infrastructure systems, cloud management and digital expertise, we build the foundation for sustainable business growth.
