

Solutions for Banking and Financial Services

Future-ready innovation built for resilience

Deliver exceptional customer experiences while safeguarding your data from fraud and ransomware with guaranteed cyber resilience. Our agile AI-powered data platform transforms banking and financial services operations, optimizing performance and costs while providing total control of your data — from one intelligent data management plane.

1. Trusted by Industry

9/10 of the Global Fortune 500 Banks have entrusted their mission critical apps and data to run on Hitachi Vantara's unbreakable highly performant data infrastructure¹.

2. Recover Faster

With a unified data platform so resilient it can [survive a direct hit from tornado](#) and be operational within just a few hours.

3. Improve Customer Experiences

Hitachi's VSP One data platform delivers [5X faster app response times](#) enabling instant anytime access to banking services.

4. Combat Fraud

Reduce credit card fraud investigation time by up to 50% with built-in AI-driven anomaly detection, real-time transaction monitoring and automated alert handling capabilities².

5. Accelerate Compliance

Free up administrative resources with automated and centralized data management tools that save up to [79% on audit time](#).

6. Slash Operational Costs

[Save up to \\$18K per month](#) with customizable EverFlex consumption options and the ability to efficiently scale capacity on demand.

7. Explore new revenue possibilities

NVIDIA powered AI solutions [train AI models up to 20X faster](#), enabling quicker time-to-revenue at scale.

8. No More Interruptions

Ensure round-the-clock operations with a one-stop data protection and business continuity solution with automated failover that can [cut disaster recovery time by up to 95%](#).

9. Boost Business Performance

Ensure billions of financial transactions run smoothly with a storage platform that boosts [mission critical performance by up to 4X](#).

10. Operate Efficiently

[Drive efficiency up by 70%](#) with a cost-effective and flexible consumption model, and services ensuring fast, affordable, and on-demand managed storage.
