Hybrid cloud is quickly becoming the gold standard for organizations looking to increase agility and overcome operational complexity. There are a number of reasons why, from faster application development to workloads that need to be close to you — with maximum control — now more than ever. If you’re still looking for answers, here are ten reasons why more and more customers are choosing Hitachi Hybrid Cloud Infrastructure, powered by VMware Cloud Foundation.

1. **Agility and Flexibility**
   - **One platform for your hybrid and multi-cloud strategy.** Hitachi Unified Compute Platform HS supports traditional VMs and modern containerized workloads.

2. **VMware Tanzu**
   - **Modernize apps anywhere and get complete agility and scale.**

3. **Simplify**
   - **Deploys software-defined storage on-premises.**
   - **Reduce infrastructure deployment, configuration, and operational overheads while maximizing on your existing SAN investments.**

4. **Accelerate**
   - **Turbo-charge mission-critical apps with a high-performance hyperconverged infrastructure powered by Intel 3rd gen processors and Optane 2nd gen SSD.**

5. **Optimize**
   - **Accelerate modern workloads, from AI and data analytics to HPC, with an AI-driven infrastructure.**

6. **Cut Costs**
   - **Reduce acquisition and operational costs, with lower compute and operational overheads while maximizing on your existing SAN investments.**

7. **Peace of Mind**
   - **Protect against cyber threats with granular data protection, advanced security fabric and micro-segmentation ensuring business continuity.**

8. **Benefit from deep industry expertise when you partner with Hitachi and get a cloud solution built to set you apart from your competition.**
