More than 85% of Fortune 100 organizations trust Hitachi Vantara with their data infrastructure needs.

Customers in the top five industries trust Hitachi Unified Compute Platform (UCP) RS with their enterprise apps

Built on a trusted Hitachi-VMware partnership, key use cases for Hitachi UCP RS might include:

**Infrastructure Services**
- UCP Advisor
- SDDC Manager
- Virtual Storage Platform
- Hitachi Unified Compute Platform RS

**Services**
- IT Operations
- Developer

**The Evidence**

**Why customers choose Hitachi for their hybrid cloud infrastructure:**

- Faster time to production, with an integrated analytics solution, powered by VMware Cloud Foundation. Intelligent automation accelerates workload deployment and configuration, enabling efficient and effective use of cloud resources.
- Fail-safe performance delivered by the same Intel 3rd gen processors and Optane 2nd gen SSD maximizes app performance.
- Future-proofs cloud, core and edge with a powerful modern architecture powered by latest Intel 3rd gen processors and Optane 2nd gen SSD.
- Full-stack management with single pane of glass management for hybrid cloud deployment, including hyper-converged and converged systems, and common management from edge to cloud.
- Future-proof growth with powerful scalability architecture powered by latest Intel 3rd gen processors and Optane 2nd gen SSD.
- Full-stack performance delivered by the same linked 3rd gen processors and Optane 2nd gen SSDs.

**Accelerate Business Outcomes With Flexible Hybrid Cloud Solutions Engineered for Data-Driven Organizations, by Hitachi Vantara**
