# Enhance Agility, Simplify Data Management, and Optimize Costs

with Hitachi Integrated Systems solution with Microsoft Azure Local

## Transform your hybrid infrastructure with Microsoft's premier edge platform.

### The Challenges of Maximizing Your Azure Workloads

Businesses are seeking integrated hybrid storage solutions that integrate natively with Azure and scale dynamically across multiple environments. These businesses aim to enhance business agility while facing competition from new applications and services. Meanwhile, IT organizations grapple with maintaining existing server and storage systems while seamlessly integrating with existing on-premise systems

via ongoing data migration. Additionally, Azure's impressive speed and scalability attract customers where the need for application and data storage performance, cost, and regional data compliance drive the adoption of a hybrid cloud approach for greater availability. Data resiliency must consider differing disaster recovery, business continuity, and strategic workload transfer based on business needs and resources of an organization. Lastly, many Azure customers are adopting hybrid cloud strategies to optimize workload distribution, enhance resource utilization, increase budget flexibility, and ensure cost predictability. By transitioning from traditional captive systems to an operationalized as-a-service model, they can also mitigate unexpected data egress charges while retaining the benefits of on-premise storage.

### Edge-Core-Cloud Extensibility

Effortlessly and reliably run edge workloads on Hitachi Integrated Systems and manage your hybrid cloud with Azure Arc

### Accelerated Innovation

Foster innovation using on-demand Azure application services

### Hybrid Cloud BCDR

Leverage Hitachi Integrated Systems with Azure Site Recovery, Backup, and Arc for robust recovery strategies

## The Flexible, Availability, and Optimized Value of Your Hybrid Cloud Solution at Global Scale and Efficiency

[Hitachi Advanced Server HA810/HA820/HA815/HA825 G3 Validated Nodes and Integrated System for Azure Local](#), combined with Azure Arc integration, offer a powerful, scalable, and secure hybrid cloud solution for businesses of all sizes. This comprehensive solution enables organizations to modernize their data center and edge infrastructure, streamline hybrid cloud and lifecycle management with **Hitachi Integrated Systems Solution Builder Extension**, and maximize IT resource efficiency. Also enhanced by Hitachi Integrated Systems with Azure Local, it provides robust data management capabilities. Below are the solution components:

- **Hitachi Integrated Systems**: The G3 validated nodes and Integrated System for Azure Local provide a high-performance, reliable foundation for organizations seeking

to upgrade their on-prem infrastructure. Built on industry-leading hardware, Hitachi advanced servers deliver robust compute power and storage capacity, excelling in modern workloads.

- **Azure Local**: As Microsoft's hyper-converged infrastructure solution, Azure Local enables businesses to run virtualized applications on-premises while seamlessly integrating with Azure for cloud services. This hybrid cloud platform simplifies management and deployment, ensuring data security and compliance across diverse environments.
- **Azure Arc**: Azure Arc extends Azure's management capabilities to resources running on-premises, at the edge, or in multi-cloud environments. With Azure Arc, businesses can monitor, manage, and apply consistent policies across their entire hybrid infrastructure, reducing operational complexity and ensuring a unified governance model.

# Hitachi Integrated Systems for Microsoft Azure Local

Hitachi HCP Anywhere Enterprise with Hitachi Integrated Systems with Azure Local enhances Azure hybrid cloud management with a **global file system**. It ensures seamless data synchronization across cloud, core, and edge environments. This solution meets enterprise file sharing needs, from document sharing to AI/ML model operations.

Key benefits include up to an **80% reduction in edge footprint**, up to a **65% reduction in network, edge, and cloud storage**, and up to an **80% reduction in backend costs**<sup>1</sup>. It also supports seamless NAS migration and offers APIs for automation and analytics, ensuring efficient and secure data management.

The **Solution Builder Extension (SBE)** for Azure Local simplifies updates, enhances management, and reduces

downtime by leveraging Microsoft's solution update channel to seamlessly deliver vendor updates. This integration ensures systems remain current with the latest features and security patches, minimizing business disruptions.

[Hitachi Solution Builder Extension for Azure Local](#) offers these seamless benefits, ensuring a smooth and efficient update process while supporting both HA810/820 G3 and HA815/825 G3 Validated Node and Integrated System models.

## Solution Key Benefits

- **Performance Excellence:** Deliver high-performance, optimized Azure Local with Hitachi Vantara's nodes.
- **Hybrid Cloud Simplification:** Streamline management and operations with seamless Azure integration.
- **Future-Ready Scalability:** Adapt easily to evolving business requirements.
- **Robust Security:** Protect data across locations with comprehensive measures.
- **Accelerated Innovation:** Foster innovation using on-demand Azure application services.
- **Legacy App Consolidation:** Efficiently run and maintain legacy apps on Azure Local.
- **Resilient Scalability:** Expand capacity and ensure fault tolerance with Azure Local.
- **Reliable Branch Office Modernization:** Agile, scalable Azure Local deployments with Hitachi Integrated Systems, networking, GPUs, and [Arc-enabled services](#).
- **Hybrid Application Development:** Accelerate app lifecycle management in Azure and deploy those apps with Azure Arc on the edge footprint with Hitachi Integrated Systems.
- **High Performance Edge Computing:** Harness Hitachi Integrated Systems and Azure Arc for real-time data processing and performant SQL databases with portal management.

65%

Reduction in network, edge, and cloud storage

## Discover The Hitachi Integrated Systems solution for Microsoft Azure Local

Designed for edge, core, or managed CoLo environments, Hitachi Integrated Systems empowers you to build, deploy, and manage hybrid applications and data at your own pace. Enjoy enterprise-level flexibility and scalability with Azure-integrated offerings. Hitachi Integrated Systems ensures unparalleled resiliency with disaster recovery, cost-effective redundancy, and seamless data synchronization. Optimize costs, lower risks, and maximize ROI by modernizing IT infrastructure, automating processes, enhancing Azure interoperability, and providing agile operational flexibility. Choose Hitachi Integrated Systems for unmatched flexibility, consistent resiliency, and superior efficiency in your Azure hybrid cloud environment. Let us help you modernize your hybrid multi-cloud infrastructure.
