SOLUTION BRIEF

Modernize Your Oracle Database Infrastructure

High-performance database-as-a-service for responsiveness, governance, and RoI

Faster Responses

Support larger databases and accelerate complex queries with low latency and higher throughput.

Reduce Oracle TCO

Up to 30% lower infrastructure, support, and licensing costs to save on technology budgets

Cloud Operating Model

Customer-service catalog for DBaaS with optional fully-managed operations.

Realize up to 450% gain in performance for your mission-critical Oracle databases and significantly reduce infrastructure and licensing costs with Hitachi Unified Compute Platform solution

Oracle databases are critical to business operations for organizations ranging from large financial service providers to health care institutions and retailers. With their scale, performance, and automation, Oracle databases provide the foundation for transaction processing and analytics services. Businesses innovate faster and drive value when Oracle databases power their core applications.

However, customers with a cloud-first strategy for their IT planning find it tricky to migrate Oracle databases to public clouds due to potential performance issues or regulatory compliance requirements. Minimizing latencies on databases powering revenue-impacting workloads is no longer an option for businesses.

Hitachi's pre-validated turnkey Oracle infrastructure solution delivers ultra-low latency in micro-seconds to power your most-critical workloads. Orchestration, licensing governance, and as-a-service consumption simplify managing Oracle database environments.

High Performance
Run critical applications with micro-second latency.

Slash TCO
Significantly reduce infrastructure and Oracle license costs

Database-as-a-Service
Advanced automation for deployment, provisioning, and life cycle management
Continuous Availability
Industry's only 100% data availability guarantee with energy efficient VSP storage

Multi-cloud Ready Oracle Solution

- Turnkey integrated Oracle infrastructure
- Orchestrated deployment for database instances
- Oracle license compliance and audit management
- Flexibility to deploy Oracle and other databases
- Help sustainability by replacing database storage server sprawl with VSP storage solution
- Single point of support for your database stack
- Non-disruptive automated upgrades
