

Top Six Advantages of Converged Infrastructure: Hitachi Unified Compute Platform CI

CHECKLIST

Are you tasked to deliver new digital applications on an ever-shorter timescale, with a shrinking budget and fewer staff? Hitachi Unified Compute Platform CI (UCP CI) matches rapid deployment with flexible support for any application. It improves efficiency and simplifies manageability, to accelerate your digital transformation.

Flexible Configuration for Optimized Application Performance

UCP CI offers a broad range of compute and storage components that can be scaled and configured independently to eliminate overprovisioning. It also gives you a choice of operating environments to maximize your flexibility. With UCP CI, you can optimize your data center to run any application workload, at any scale.

Find a system that adapts to your specific workload requirements so your budget is used for only what you need and nothing you don't.

An Ideal Foundation for Your Modern Data Strategy

Combine Hitachi's enterprise-grade hardware, trusted tools for data management, data protection and disaster recovery, and all-in-one support for the entire converged stack. Create a foundation you can depend on for mission- and business-critical applications.

Choose a vendor or partner who knows data and has the tools to manage, protect and support your most valuable asset.

Meet New Business Needs With Cloudlike Agility

Dynamically scale up or scale out, and flexibly configure both virtual and physical environments to meet the needs of a wide range of use cases. Add new hardware without downtime; configure virtual machines in minutes, to respond to any new workload; and enable a modern data strategy with ubiquitous data services.

Today's digital business is more demanding than ever before and is always changing. Select an adaptable and responsive converged system to run transformational "systems of innovation."

Simple Management and Automation Save You Time

A single, intuitive interface for the entire stack and the integration of management, orchestration and automation simplify deployment, increase efficiency and remove risk of human error. You spend less time on mundane management and can focus on more important initiatives.

The aim of a converged solution is to require less time to “keep the lights on,” freeing resources to meet strategic business requirements.

Rapid Deployment Gets You Productive Fast

Accelerate data center time to productivity with easier planning, procurement, installation and management.

Identify a converged solution that offers simple, pretested building blocks that can help you speed deployment.

Easily Scale Up and Scale Out as Needed

Start small, and easily scale to keep up with changing business demands. As you grow, sophisticated management tools advise you when additional capacity is needed and guide your investment for maximum value.

Choose a platform that makes managing a growing environment as simple as your initial deployment.

Learn how UCP CI converged solutions from Hitachi offer these advantages, and more, to quickly improve the performance and management of your infrastructure.
