Flexible Infrastructure Management: The Control You Need

Hitachi Solutions for a Modern Infrastructure

Exploding Data Volumes.
Complex Systems.
Increasing Remote Workers.

Data capacity and growth cited the top storage pain point by

53%

of respondents[1]

To address and overcome these mounting pressures, you need a simplified infrastructure management – with the flexibility to adapt as your environment increases in complexity.

Hitachi Virtual Storage Platform (VSP) arrays include flexible storage management that addresses the needs of small and large IT organizations, with simple and rapid array setup and controls.

For more granular features or if you have multiple arrays, a simple switch to **Hitachi Ops Center** delivers AI-driven, advanced management capabilities for more control. **Because business is anything but predictable.**

Flexible Infrastructure Management Options That Scale With Your Business

Choose the management that's included in every Hitachi Virtual Storage Platform (VSP) for rapid set-up and provisioning of storage.

Cloud-based monitoring and alerting provides critical system reporting remotely.

Easily switch to Hitachi Ops Center for more advanced analytics, automation and data protection.

EASY **FLEXIBLE** **GRANULAR CONTROL**

> "Simply put, there is too much information for humans to efficiently analyze. There are too many concurrent events happening across various technologies to effectively process, filter, analyze, and act upon."
>
> By Mike Leone, ESG Senior Analyst; and Leah Matuson, Research Analyst, from Transforming IT Operations to Enable Better Business Outcomes

The Simplicity You Want Today.
The Sophistication You'll Need Tomorrow.

The management included in Hitachi Virtual Storage Platform (VSP) arrays:

- Included with the VSP E series.
- Small deployment, single VSP array.
- Simple setup and rapid provisioning.
- Default configurations for simplicity.
- Ideal for time constrained IT admin staff.
- Future integration with cloud-based management.

AI driven storage management with Hitachi Ops Center delivers:

- Centralized, system level control.
- 90% faster resource delivery.
- 70% more operationally efficient.
- Rapid problem resolution via root cause analysis.

EASILY SWITCH FROM VSP INCLUDED MANAGEMENT TO OPS CENTER AS YOUR NEEDS CHANGE…

So You Can Automate, Innovate, and Facilitate. Fast.

SCALE UP BUSINESS EFFICIENCY.
Gain insights to drive more informed decisions and automate resource delivery.

BOOST IT AGILITY. AT SCALE
Get projects to market faster, automate IT, and more support for DevOps.

TIP THE ADMIN SCALES IN YOUR FAVOUR.
Intuitive, embedded configurations and fast, flexible provisioning means less admin.

SCALE BACK STORAGE AND ADMIN COSTS.
Boost operational efficiencies and nurture new approaches to IT delivery.

What You Get When You Switch to Hitachi Ops Center

Hitachi Ops Center Administrator – reduce management, simple configuration and align VSP storage resources to business needs.

Hitachi Ops Center Analyzer – end-to-end analysis to prescribe and predict.

Hitachi Ops Center Automator – streamline to deliver resources up to 90% faster.

Hitachi Ops Center Protector – modern data protection and recovery with enterprise copy data management.

Proven, Powerful, Predictable

The world has changed. Your business cannot afford to play catch-up.

Go from what's now to what's next, with infrastructure management solutions from Hitachi Vantara.

We Are Hitachi Vantara

We guide our customers from what's now to what's next by solving their digital challenges. Working alongside each customer, we apply our unmatched industrial and digital capabilities to their data and applications to benefit both business and society.
