

Data

Think Bigger With Your Data Partnerships

As data volumes soar, your budgets are tightening. So, you'll need another way to make big ambitions possible. Seizing huge opportunities, with limited time and resources.

Only new heights of control and vast efficiencies can change the equation. To achieve them, you'll need to combine the powers of two data giants. Here are 4 ways how:

Get a titan's perspective

No insight should fall through the gaps. To monetize data, you'll need to **keep your eyes fixed on big goals**. And align small details with a clear purpose.

That means integrating everything – breaking down silos and moving data seamlessly.

Align solutions with big-picture ambitions, thanks to one of the broadest portfolios around. All from tight-knit partners, who've designed everything to work together.

Hitachi data collection, management and governance dovetails at every touchpoint with Cisco's governance, management and analytics.

Think bigger

Think bigger, see simpler

More hardware, more infrastructure and more storage won't cut it. Not for a truly data-driven business.

Instead, it's about seeing and controlling your hybrid cloud estate as one, as data moves through every step of the lifecycle – from edge to core to cloud.

Balance availability, cost-efficiency and performance. Optimize capacity. Plus, install, configure, deploy and monitor faster.

With Hitachi and Cisco, you'll get a complete view of your data management and joined-up support through a single point of contact and a single SLA.

Use deep expertise, at any scale

Whether you're starting small or rolling out sweeping transformation, **one size never fits all**.

You'll need industry-specific consultancy, local support and access to instantly scalable resources – anywhere in the world.

Only giants have the range of resources and breadth of expertise to open new doors anywhere.

Hitachi companies feature in industries such as transportation, energy, IT, healthcare, and heavy equipment manufacturing. The collaboration with Cisco spans across all of these, delivering industry tailored data life cycle management.

Shrink your risks

Shrink your risks at every step

With tight regs and high stakes, your data needs to be safe. But as you set transformation in motion, the risks can spiral.

You'll need to design security into every move you make. Covering the risks, across technologies and between clouds.

Guarantee relentless uptime, consistent service and constant security. The easy way.

With Hitachi and Cisco, it's all covered under your SLA. So, you can simply name your needs, and we'll design a solution – and an implementation plan – that delivers.

We are Hitachi Vantara

Hitachi Vantara delivers the intelligent data platforms, infrastructure systems, and digital expertise that supports more than 80% of the fortune 100. We turn data-rich businesses into data-driven ones through agile digital processes, products, and experiences.
