

Simple, Scalable and Cost-effective Data Management with Hitachi and Wasabi

What is Hitachi Content Platform (HCP)?

The Hitachi Content Platform (HCP) is a highly efficient, object storage solution designed to support large-scale repositories of unstructured content. HCP is a software solution that connects data producers, users, applications, and devices into a central cloud storage platform. It enables users to understand better, govern, and control the degree of mobility of their data, as well as to identify insights and extract value for data-driven decisions and faster time to market. IT also features a compliance mode designed for preserving records in a non-rewriteable, non-erasable format.

Why Hitachi Content Platform and Wasabi Are Better Together?

HCP integrates with Wasabi via a S3 API, for improved data management and accessibility. This integration allows HCP to store and manage data on the Wasabi cloud, providing a cost-effective and scalable solution. Customers benefit from the reliability, security, and performance of HCP while taking advantage of Wasabi's lower flat rate storage costs without any egress or API fees. This integration is ideal for organizations looking to adopt a hybrid cloud strategy, leveraging the strengths of both HCP and Wasabi to meet advanced data management needs.

Hitachi and Wasabi architecture

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi Hot Cloud Storage is designed with eleven

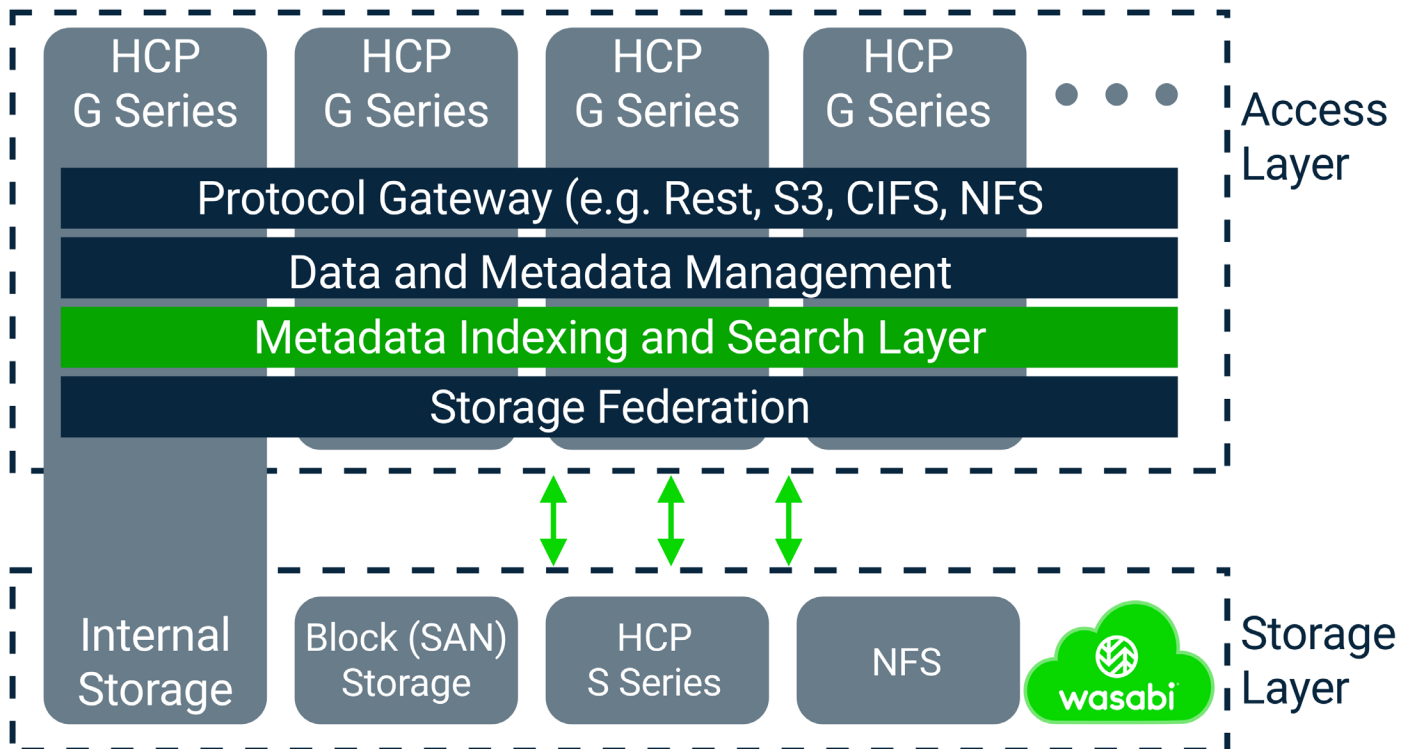

KEY FEATURES

- High-performance, scale-out object storage for private, hybrid, and multi-cloud environments
- Multi-tiered, multi-tenant, for small, midsize and enterprise organizations, and service providers
- Robust data security and privacy functionality

BENEFITS

- Cost-effective data management & cloud storage
- Increased reliability and financial predictability
- High-performance architecture for managing data at scale

nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data “hot” so it can be accessed in milliseconds. All Hitachi Content Platform and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.
