## Hitachi Data Systems Support Services

### Service Descriptions & Deliverables

The tables below contain support services details of coverage under an HDS warranty and maintenance service agreement. These tables and all other terms set out below are subject to change at any time. To view HDS Legal Terms and Conditions, please visit: <https://www.hds.com/corporate/legal/>.

### Hardware Support Services Terms

| Deliverable                       | Remote               | Weekday Basic                | Standard   | Premium   |
|-----------------------------------|----------------------|------------------------------|--|---|

Revised September 2017

Hi-Track Monitoring and Installation is available for all HDS hardware products except HDI Remote Server.

\* Denotes that a mandatory upgrade is required.

\*\* For HVP Gateway and Pods: Sev 3 and 4, 3 business days | Customer specific remote Pod components (cameras, switches, radios, etc.) | May substitute at HDS discretion parts with similar form, fit and function | May replace with repaired/refurbished components | Terms apply to standard stocked components. Terms for special order parts including radios will be agreed case by case by SOW. | PODs may require a certified electrical subcontractor for installation or replacement. Electrical subcontractors are not included in published maintenance fees. Subcontractor services require a separate quote and SOW | HVP Gateways and PODs containing internal storage include DRO (see below), under which media will be turned over to the customer during the field repair process. | Replacement Parts Delivery Target: NBD

| Internal VM replicated customer environment for faster resolution | No        | No                | Yes               |

<sup>1</sup>24x7 support coverage is only available for Severity 1 issues.

## SaaS Support Service Terms

- **24/7 Access** to online support tools (technical information, documentation and downloads)
- **24x7 Access** to associated software downloads
- **24/7 Global Technical Support** (remote assistance with fault isolation, configuration, use and operation of the software and related issues)
- **Automatic Access** to SaaS updates

### SaaS Updates

SaaS Updates shall be made available at HDS discretion and may address security fixes, problem fixes, general maintenance, new or deprecated functionality and documentation. HDS is under no obligation to develop any future functionality or enhancements. If an update for an SaaS product is made available to you pursuant to these SaaS Support Policies, it shall automatically replace the previous version of the applicable SaaS product. Updates may require scheduled downtime for which HDS will announce in advance via Support Portal Alerts.

### Supported Browsers

HDS reserves the right to require a SaaS problem be demonstrated on a supported browser, which may vary by product. Supported browsers are documented in product updates for each SaaS.

## Active HDS SaaS Products

| Product Name/Family                    | Warranty Service | Warranty Period |
|--|------------------|-----------------|
| HSIA Social Intelligence Analyzer      | Conformance      | 90 Days         |
| HVS Hitachi Video Suite – Public Cloud | Conformance      | 90 Days         |
| Lumada – Public Cloud                  | Conformance      | 90 Days         |

Added September 2017

## Footnotes

### Hitachi Data Systems Support Services are subject to the following conditions:

- On-site presence is determined by HDS Global Support Center. Distance and coverage restrictions may apply.
- On-site availability: 50 miles/80 kilometers from an HDS Service Center. Subject to HDS discretion to extend coverage on a case-by-case basis.
- Target deliverable responses may vary by locations or geography.
- Spares target delivery dates are estimates that HDS uses to achieve commercially reasonable endeavors; however, actual delivery times depend upon external factors such as spares availability and logistics resourcing. HDS is not liable to the customer if actual delivery is delayed by these factors or any other factors that are outside of our control.
- Local business hours may vary by locations or geography.
- Same Day SLA refers to 7 days a week.
- Preventative maintenance is completed during activity window (break/fix).
- Global technical support response times vary by client impact classification (severity levels).
- Requests for on-site microcode updates outside of normal local business hours are billable services.
- Ongoing media replacement policy: For any flash drive, HDS will replace it free of charge, provided that Customer has a valid and current maintenance and support services contract that covers the drive.

HDS requires that all equipment and software that is installed as part of the same product offering to be subject to HDS support and service contract for that product offering, except in the case of third-party products supplied by HDS, but not maintained by HDS, for which you are required to obtain maintenance and support directly from the vendor of the third-party product.

HDS may periodically make changes to support service options to provide service efficiencies. We will make every effort to discuss those with you in advance, and such changes will only apply to new services after the change is announced.

The HDS Warranty Maintenance and Support Terms within your current HDS service plan, as well as other service contracts that you have with HDS, will include these terms. If there is an inconsistency between your existing terms and those outlined here, these terms will prevail. Please contact your HDS account representative or authorized partner if you wish to discuss.

Review Hitachi Data Systems complete terms and conditions at [www.HDS.com](http://www.HDS.com).

### Severity Levels Descriptions

- **Severity 1: Critical**  
Severe System or Application Impact. Impact is to an entire system, major business function or application.
- **Severity 2: High**  
Degraded or Severely Limited System Impact. Impact is to a portion of a system, major business function, geographical location or application.
- **Severity 3: Medium**  
Individual User Impact. Individual(s) is (are) unable to perform required functions; work-around or circumvention is available.
- **Severity 4: Minor**  
Minimal System Impact. Information only.

### Customer-Replaceable Units (CRUs)

- A CRU is a subassembly of components or individual parts that the customer is authorized by HDS to remove and replace. All other components not designated here must be serviced by HDS or an authorized HDS representative.
- Installation of CRUs is the responsibility of the customer. Installation of all other non-CRU parts is performed by HDS.
- If HDS installs the replacement part, HDS will arrange for its return to an HDS facility. If a customer installs the CRU, the customer is responsible for returning the replacement CRU to a facility designated by HDS.

### VSP Warranty Service Exception

For Hitachi Virtual Storage Platform products, VSP Warranty and Maintenance service levels are equivalent to Standard Support. The Warranty and Maintenance Plus service levels are equivalent to Premium Support.

### Disk Retention Option (DRO)\*

- Forgives defective media return and any billable subsystem customer nonreturned media.
- All removable media, all products [hard disk drives (HDD), solid-state disk (SSD), flash module (FMD), and so forth]: all platforms and all products.

### Microcode/Firmware Updates

- Effective October 1, 2015, HDS standard policy will be to deliver microcode/firmware updates remotely whenever possible.
- Sophisticated remote technology enables fast, efficient microcode delivery that doesn't require an engineer to travel on-site to the customer's location.

## Installation Services

- Verify agreed-upon configuration.
- Configuration of RAID groups Logical Units (LUNs) is the responsibility of the customer or provided as an HDS Service.
- Physical inspection for shipment damage.
- Physical connection of cable interfaces to the storage system.
- Installation of as entering the supplied license key for storage-system-based software.
- Installation of operating system, Hitachi Base Operating System (BOS), and Hitachi Storage Virtualization Operating System on HDS equipment.
- Confirmation of maintenance provisions and call handling procedures.
- Training: basic handling of equipment and configuration.
- Performance period: Local Business Hours, Monday–Friday. Excludes Public Holidays at the location where services are provided.
- Notes:
  - On-site pre-delivery survey and off-hours install available: additional fee-based billable service.
  - Physical installation of HBAs is excluded.
  - Configuration of RAID groups Logical Units (LUNs) is the responsibility of the customer or provided as an HDS service.

## Hi-Track Remote Monitoring Service

Enabling Hi-Track Remote Monitoring is required for all HDS service and support offerings:

- Remote monitoring service system.
- Free-of-charge support feature or facility: HDS Customer Support service offerings.
- Continuous monitoring 24/7.
- Secure controlled access: layered encryption and authentication.
- Advanced systems diagnostics: engineering-design embedded.
- Proactive predictive fault isolation.
- Reports system incidents and potential problems.
- Facilitates or enables real-time, rapid-action expert troubleshooting.
- Integrated and linked: HDS Support Services management systems.
- Provides and facilitates trend analysis and analytics.
- Customer-system site installation and implementation.
- Customer requisite: access and required equipment, telecommunications and so forth.
- Hi-Track system is HDS proprietary property.
