

Hitachi Vantara Certified Professional

DATASHEET

Enhance and Validate Your Storage Skills

The Hitachi Vantara Certified Professional program is an industry-leading, role-based, certification program. It provides knowledge and skills validation through a variety of exams in the areas of storage solutions architecture, implementation and administration, using Hitachi Vantara hardware, software, solutions, services and technology.

Benefits

With the Hitachi Vantara Certified Professional program, IT professionals can:

- Validate their skills, knowledge and technical competencies.
- Establish their credibility and increase their value in the IT marketplace.
- Gain peer recognition and distinguish themselves from the competition.

Credential Levels

The Hitachi Vantara Certified Professional program features a two-tier assessment structure that provides an evolution path as professionals increase their expertise and advance their careers.

Qualification-level testing leverages low stakes exams typically used for validation of broad and general expertise on subjects that evolve rapidly and for validation of basic and fundamental technical knowledge acquired academically.

In most cases, passing a qualification test leads to a qualification credential. Passing a test can also be a requirement for a certification credential. Hitachi Vantara currently offers two qualification levels: Associate and Professional.

Certification-level testing effectively and accurately validates that candidates have the skills, knowledge and abilities to perform specifically identified tasks as they relate to real-life job situations.

In order to pass certification exams, candidates are expected to use knowledge acquired through multiple means and real-life experiences, including various formal and informal training and learning methods.

In most cases, passing a certification exam leads to a certification credential. Alternatively, multiple exams may be required to obtain a certification credential. Two certification levels are currently available: Specialist and Expert.

Track Name	Credential	Edge-to-Core-to-Cloud Infrastructure				Intelligent Data Operations	
		Storage	Data Protection	Converged Systems	Modern Object Store	Business Analytics	
Sales	Professional	Solution Selling HQT-1001
