Accelerate your transition to a digital-driven approach to data protection.

• Provide a prevalidated and preconfigured service

Business continuity and data resilience have become integral in today's IT environment.

You face challenges, such as finding ways to:

- Become integral in today's IT environment.
- Business continuity and data resilience are among their top 10 investment priorities.
- Modern Data Protection

In the dynamic, always-on digital era, data grows exponentially without regard for an organization's business requirements.

Downtime is Not an Option

When You Succeed, We Succeed

More than 98% of large enterprises with less than 1,000 employees report that, on average, a single hour of downtime costs $279,000.

Modern Data-Driven Business Challenges

Your Success Begins With the Right Data Protection Strategy

Only 35% of large enterprises report that their application availability is monitored. 91% of organizations report that 35% of outages are caused by natural disasters, 45% are due to human error, and 20% are due to component failure.

Data Resilience for the Digital Age

Transform Your Business With Modern Data Protection
