Supporting Material

[Certified Specialist – Pentaho Business Analytics](#)

This test is designed for Hitachi Vantara employees, partners, and customers. It validates that the successful candidate has knowledge, skills, and abilities to implement Pentaho Business Analytics solutions. This includes thorough understanding of deployment and integration procedures and best practices. This test covers Pentaho User Console (PUC), Reporting, Modeling, Installation, Data Sources and Performance Tuning.

Audience: Hitachi Vantara customers, partners and employees who implement Pentaho Business Analytics solutions

Business Analytics implementation personnel should have strong knowledge and skills in deploying, integrating, and using the Pentaho Business Analytics solutions. They assist with architecture, design, development, implementation, integration, performance tuning, rollout, and optimization of the deployed Pentaho solution. Typical audiences include business intelligence consultants, developers, and technical business analysts.

Attaining the knowledge necessary to pass this exam can be gained through a mix of experience and education. Hitachi Vantara provides a range of courses which can help students along this path. Click [here](#) for information about supporting courses.

Test Objectives

Test Objectives	
Section 1	Installation
