

Transform **Together**

Turn Change Into Opportunity

The relentless surge of data continues to create many problems as it disrupts traditional ways of working. But data is also your greatest asset. It can create new business opportunities and open up vast new markets, if you know how to use it.

The key to new revenue streams, better customer experiences, and lower business costs is there in your data, waiting to be discovered. It reveals your path to innovation and new ways for you and the world to work.

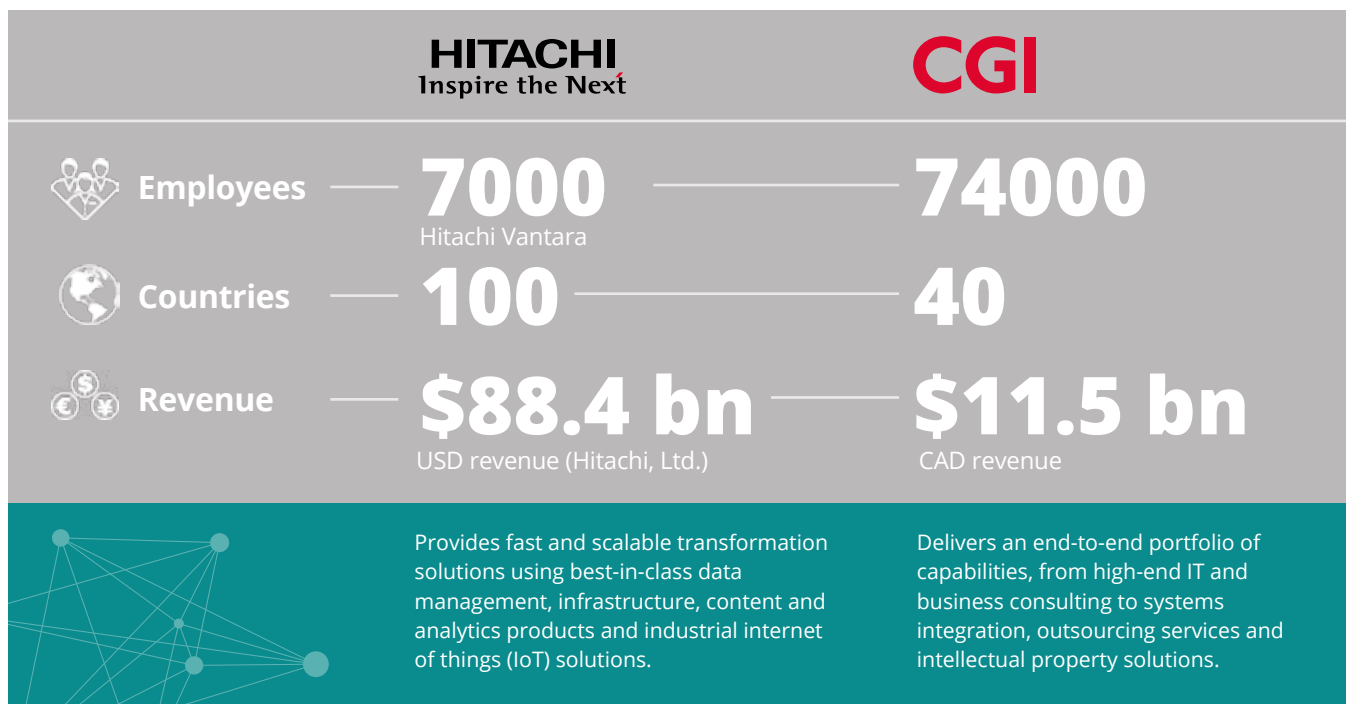

In order to thrive, rather than just survive, organizations need to face up to the stark reality that they must transform – and transform quickly.

However, change can be a real challenge, unless you work together with an experienced partner. And that's where CGI and Hitachi Vantara can help.

A Proven Partnership

For over 20 years, CGI and Hitachi Vantara have been working in partnership to drive business transformation. Together, we unlock the full value of your data and provide a path to intelligent innovation – at the speed modern industry requires, regardless of the business challenge complexity.

We combine technology, intellectual property and industry knowledge to deliver data-managing solutions that help you, our joint customers, to improve your customers' experiences, develop new revenue streams, and lower the costs of business.

Unlock Added Value

Hitachi Vantara provides the technological building blocks needed to transform the way a business operates. By combining them with their service and industry expertise, CGI is able to be more responsive to your needs and deliver solutions with an agility and speed that would otherwise not be possible. This enables you to:

- Consume solutions “as a service” and turn them on or off as needed.
- Implement projects rapidly and realize the benefits much faster.

By taking advantage of Hitachi Vantara’s capabilities, leveraged from its suite of solutions and services, CGI has been able to streamline operational activities and reduce implementation timescales.

The breadth and depth of CGI’s expertise across legacy and digital environments means that it is uniquely able to help you achieve superior value at every point in your digital transformation journey.

New Ways To Work Together

CGI and Hitachi Vantara offer a wide range of joint solutions, including:

- **Storage as a Service (STaaS)**

A fully managed, pay-as-you-go storage service with predictable, transparent pricing and guaranteed outcomes (SLAs).

- **Hybrid Cloud Services**

Pre-engineered, fully managed, cloud services with utility-based pricing, lower costs and predictable service levels, powered by Hitachi Enterprise Cloud.

- **“CGI Drive”**

A cloud service that provides an enterprise-grade file synchronization and sharing solution with the data residing securely in CGI data centers, based on Hitachi Content Platform Anywhere.

- **Data Unification Service for SAP S/4HANA**

Implements enterprise resource planning (ERP) solutions that unify data and operations and enable faster decision-making with advanced analytics, using Hitachi Unified Compute Platform (UCP).

- **Genomics as a Service**

Allows clinicians and researchers to quickly and easily sequence their patients' genomes and compare the data against a reference library.

The ability to leverage innovative new technologies to draw new insights from data is a key tenet of CGI's approach and an important part of the relationship with Hitachi Vantara. In particular, we are collaborating in the areas of:

- **Digital Insights**

Hitachi's Pentaho suite for big data and analytics and Lumada solutions for digital innovation generate actionable insight. These provide a highly flexible and composable platform that gives you simplified management and greater utilization of your business and industrial assets.

- **Video Analytics**

CGI is able to offer video analytics and visualization solutions based around Hitachi Smart Spaces and Video Intelligence solutions. They are designed to keep people and property safe and protected through shared business, operational and security intelligence.

“

“The growing breadth and complexity of technological endpoints means that delivering everything as a service is increasingly important for our customers. By combining Hitachi Vantara’s IP with CGI’s managed services we will be doing things no-one ever dreamed we could do as a service.”

Jeff Smith, VP, Global Technology Operations USA, CGI

”

Better Together

Together, CGI and Hitachi Vantara can help you manage, store, govern, blend, analyze and visualize your data – and transform it into new insights and positive action.
